Mp3 Ringtone maker

Brief instruction

Mp3 Ringtone maker is a powerful but easy-to-use ring tone audio converter tool. It builds audio cutter and ringtone converter in one software. It can cut mp3 segment from most audio files such as MP3, WMA and WAV. What you need to do is play the song you want to cut, then mark the start time and the end time. You can also play the selected song before you save it.

Mp3 Ringtone maker can convert most of the audio files (MP3, WMA,WAV) to the most popular ringtone format which can be played on mobile phones (e.g. Nokia mobiles etc.) – MP3 and AMR(AMR is a codec specially developed for GSM phones).

Key features:

- Cut piece from a big audio file and then convert it to MP3 or AMR file
- Can set the start-time/end-time just when pre-listening to the song
- View the MP3 file using wave graphics
- Supports MP3, WAV, WMA input format
- Supports MP3, AMR output format
- Provided with a slider bar, you can visually and quickly get to the point where you want to convert
